

NINE CIRCLES

HAKAMA WASHING GUIDE

TETRON/POLYESTER MODELS

H-1/ H-1J / H-1J-BK / H-2-B / H-2-W / H-2-AIKI-B / H-2-AIKI-N / H-6/ H-10-N / H-10-BK

Please do not wash colored materials with white materials.

The first wash should be by hand using cold water and without detergent.

We recommend cold hand washing, but if needed you can use your washing machine on delicate cycling and following the instructions:

1. Fold the Hakama and put it inside a laundry net to prevent tangling and keep the pleats in place.
2. Wash it alone from other laundry to prevent wear and tear from buttons, zippers or other embellishments.
3. You can use mild detergent. Do not use chlorine bleach nor detergent contains a bleach additive.
4. Wash it on your machine's delicate cycle..
5. Do not use a tumble dryer.
6. Stretch it out well, making sure the pleats are in place (you can use pegs for it), before hung-drying your wet Hakama. Avoid direct sunlight.
7. Avoid ironing your Hakama. By washing it folded and leaving it wet on a clothes hanger to dry, you won't need to iron it. When needed, it has to be on low temperature and with another fabric on top (like a Towel).
